

WATERLESS WASH / DETAILER

ECO-WCW

Ordinary car washes require up to 150 gallons of water to wash a vehicle, while contaminated water flows down gutters and storm drains to pollute rivers, lakes, and oceans. This revolutionary one-step wash professionally details the exteriors of all automotives using only the water in the product itself. Advanced biodegradable polymers encapsulate dirt and lift away debris without scratching the paint. One bottle averages 6-8 washes, at 20 minutes per wash and no water. Save time, money, and the environment!

- Melts Away Dirt, Road Grime, Insects and tar
- Removes Minor Scratches
- Leaves a Streak Free Lustrous Protective Finish
- Beautiful Non-Streak Finish
- Non-Toxic & Biodegradable
- Recyclable Non-Aerosol Bottle
- Made in USA

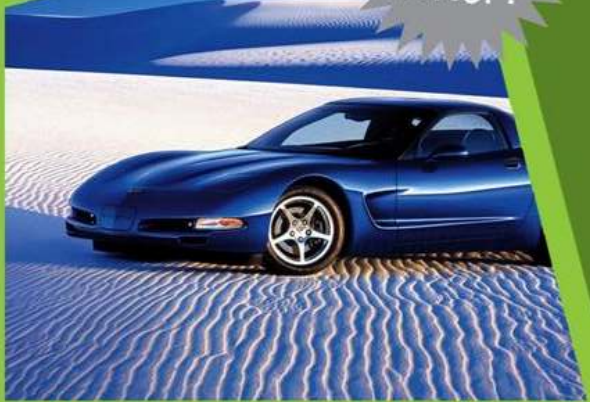

USE ON AUTOS, MOTORCYCLES, BOATS
GLASS, CHROME VINYL & RUBBER
